## PROJECTS

### Smart-Watch

Live Site: <https://niche-website-4ee72.web.app/>

Client Code: <https://github.com/Ataul-hamid/smart-watch-client>

Server Code: <https://github.com/Ataul-hamid/smart-watch-server>

- In this project, I'm developing an online shop that sells high quality Watches.

- Here, visitors can sign in or register via email and buy any Watches they want by providing necessary information.
- While signed in, a customer can cancel any order they have placed earlier from the user dashboard. A customer can add reviews of the service as well.

## Alvi Tourism

Live Site: <https://alvi-tourism-explore.web.app>

Client Code: <https://github.com/Ataul-hamid/alvi-tourism-client>

Server Code: <https://github.com/Ataul-hamid/alvi-tourism-server>

- This is tourism website, You can book any service and planned a tour here
- user can see his/her order's, user can manage order, user can see approved status
- user can Add a service here

## Go-Home-Pharmacy

Live Site : <https://go-home-pharmacy.web.app>

Github Code: <https://github.com/Ataul-hamid/go-home-pharmacy-website>

- This is an online base pharmacy . where you can buy medicine . And we delivered it to your home.
- Through this website you can find any doctor serial.
- You are also useful with women and baby care.
